

ROYAL JORDANIAN LAUNCHES MOBILE ONAIR INFLIGHT PASSENGER COMMUNICATIONS SERVICE

Passengers now able to make and receive phone calls, send and receive emails and text messages--from 30,000 feet

Geneva, Switzerland, 23 February 2009 - Oneworld member Royal Jordanian today launched mobile inflight passenger communications services from industry leader OnAir. The new commercial service, which will be available in the first phase on its recently received A319 aircraft flying to Europe, the Middle East, North Africa and India, will enable passengers to stay connected inflight using their own mobile phones or BlackBerry-type devices to send and receive text messages and emails, make and receive phone calls and access the Internet. Passengers will also be able to access the Internet using their own laptops fitted with GSM data cards.

"Royal Jordanian has always been a leader in e-travel—from providing passengers with the ability to book online to issuing e-tickets, making online seat reservations and using self check-in kiosks at the airport," said Samer Majali, President and CEO, Royal Jordanian. "We are very pleased to partner with industry leader, OnAir, to offer the latest passenger communications technology onboard our aircraft, and we expect these new capabilities to further enhance the high-quality customer service that our passengers have come to expect from Royal Jordanian."

Mobile OnAir uses the industry's most robust and extensive infrastructure for mobile communications, along with Inmarsat SwiftBroadband, high capacity services from Inmarsat 4th generation satellites. With OnAir's advanced mobile communications technology, Royal Jordanian passengers will benefit from global coverage and high-speed connectivity.

Benoit Debains, CEO of OnAir, commented: "Royal Jordanian operates in a highly competitive and demanding market, in which service excellence is

critical. They were the first airline in the Middle East to announce a partnership with us back in December 2007, and we are pleased to offer the highest available standard of connectivity to their passengers, while at the same time helping them generate additional revenues."

The Royal Jordanian launch comes amidst mounting demand for inflight passenger communications. A growing number of commercial airlines and private aviation companies either currently offer OnAir inflight communications services or will offer them in the near future. This includes airlines such as Air Asia, AirAsia X, Airblue, British Airways, bmi, Jazeera, Kingfisher, Oman Air, Ryanair, Shenzhen Airlines, TAM, TAP and Wataniya Airways. OnAir also serves private VIP and Governmental customers through partnerships with Airbus Corporate Jets, Aviation Centre Cologne and Jet Aviation.

Since December 2007, passengers have used Mobile OnAir services on around 2,500 commercial flights to more than 74 cities in 34 countries in Europe and North Africa. According to a recent passenger survey, 80% of passengers who have used Mobile OnAir services on selected flights would like these services to be available on every flight.

About OnAir

OnAir is the leading provider of inflight communications, enabling passengers to stay connected during their flight, and airlines to offer new services and generate additional revenues. Present on four of five continents, OnAir provides the only air-travel industry sponsored solution, now available to regular and low-cost airlines, to private and corporate jets, on Airbus and Boeing aircraft, and on long and short-haul flights. OnAir is the only provider of services based on SwiftBroadband, the latest high-bandwidth satellite technology from Inmarsat, which offers GSM and GPRS for voice, data and Internet.

OnAir was incorporated in February 2005 and is owned by SITA, the leading IT solutions provider to the air transport world and Airbus, the leading aircraft manufacturer. OnAir is a member of the GSM Association and an Inmarsat Distribution Partner for SwiftBroadband services.

More information about OnAir is available at www.onair.aero.

About Royal Jordanian

Royal Jordanian, which has become a private company since December 2007, was established in 1963 as the national air carrier of Jordan. Its vision is to be the Airline of choice connecting Jordan and the Levant with the world.

The airline is located in the heart of the capital, Amman, and its flights are operated from Queen Alia International Airport. Its modern fleet of 29 aircraft covers 56 destinations on four continents. RJ is also a member in the oneworld airline alliance, along with big names in the air transport industry. The company continuously reviews its plans to improve its air and ground services, broaden its route network and modernize its fleet.
